THERMAL DETECTION MISSION REPORT

Automated Hotspot Detection · AI Classification · Auto-Capture

This document provides a comprehensive intelligence analysis of thermal signatures detected during the automated flight mission. Each event was successfully isolated, geo-tagged, and classified by the onboard AI to ensure rapid situational awareness.

MISSION ID	MSN-20260502-0443

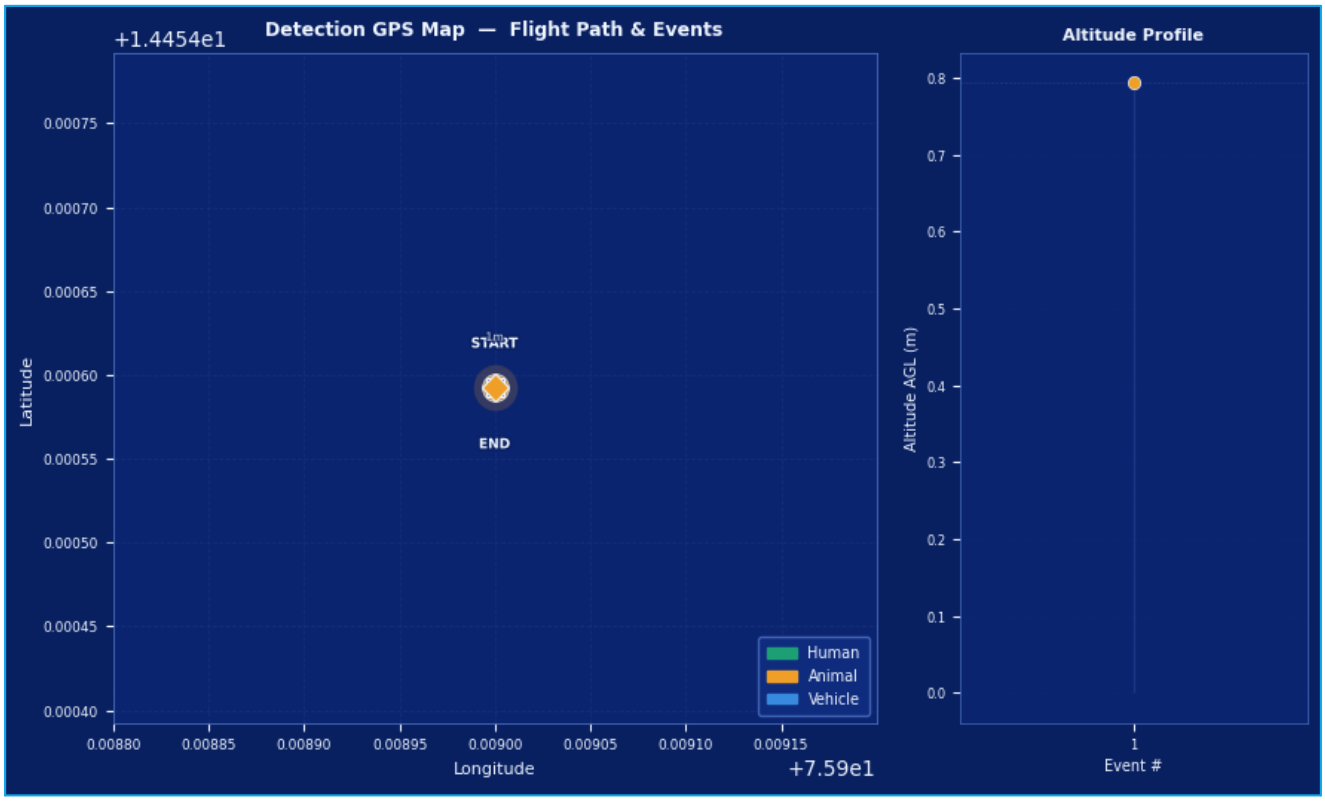
Avg Altitude	0.8 m	Total Events	1

GPS Detection Map



How to Interpret This Map: The map displays the drone's flight path as a dashed line. Each numbered point corresponds to an isolated thermal detection event. The expanded size of the dot reflects the AI's confidence in the detection. Green indicates Humans, Amber indicates Animals, and Blue indicates Vehicles. Use this map to quickly locate areas of high thermal activity and trace the patrol route.
